PROFESSIONAL SUMMARY

AI/ML & Data Engineer specializing in building scalable machine learning models, LLM applications, and automated data pipelines. Skilled in Python, Scikit-Learn, and full-stack integration to turn complex datasets into actionable business solutions. Brings a rigorous engineering approach to model training, deployment readiness, clean API architecture, and reliable, maintainable end-to-end software development.

TECHNICAL SKILLS

- **Programming Languages:** Python
- **Data Analysis and Data Manipulation:** NumPy, Pandas
- **Data Visualization:** Matplotlib, Seaborn
- **Machine Learning:** Supervised and Unsupervised Learning
- **Machine Learning Algorithms:** Regression, Classification, Clustering, Ensemble Learning
- **Deep Learning:** TensorFlow, Keras, Neural Network Fundamentals
- **Generative AI:** Large Language Models (LLMs), Prompt Engineering
- **Data Preprocessing:** Data Cleaning, Feature Engineering, Exploratory Data Analysis (EDA)
- **Web Scraping:** Beautiful Soup, Selenium
- **Development Tools:** Git, GitHub, Jupyter Notebook, VS Code

AI & ML PROJECTS

Real Estate Data Scraping & Analysis
Python, Pandas, NumPy, Seaborn, Beautiful Soup
Collected and prepared real-estate data through web scraping, cleaned and transformed datasets, performed EDA, and created visualizations to identify patterns and trends.

Machine Learning Model Development
Python, Scikit-learn, XGBoost, LightGBM, Random Forest
Practiced regression and classification models, including Linear, Ridge, Lasso, Logistic Regression, tree-based models, ensemble learning, and boosting.

Clustering & Unsupervised Learning
Python, Scikit-learn, K-Means, Hierarchical Clustering
Prepared datasets, explored feature relationships, applied clustering methods, and analyzed groups and underlying data structures.

US Restaurant Dataset, Data Analysis & Machine Learning
Python, Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn
Performed EDA, data cleaning, preprocessing, visual analysis, and machine-learning practice on structured restaurant data.

Medical Industry Dataset, Exploratory Data Analysis
Python, NumPy, Pandas, Matplotlib, Seaborn
Cleaned and preprocessed data, investigated patterns and relationships, and developed visualizations to communicate findings.

House Price & Rental Dataset Analysis
Python, Pandas, NumPy, Scikit-learn, Jupyter Notebook
Prepared housing datasets, explored variable relationships, and practiced regression-oriented machine-learning techniques.

PROFESSIONAL EXPERIENCE

AI Engineer Intern | code alpha | Sep – Nov 2026
• Contributed AI-powered CRM features using Python, machine learning and LLM-based workflows.

AI Intern | Arrowstack | Aug – Oct 2026
• Developed machine learning models and performed exploratory data analysis using Python, Pandas, Scikit-learn, Matplotlib, and Seaborn.

EDUCATION

B.S. Artificial Intelligence | The Islamia University of Bahawalpur
Currently studying

CERTIFICATION & ADDITIONAL TRAINING

Full Stack AI | NexSkill, Arfa Software Technology Park
Python for AI & Data Science | Machine Learning with Scikit-learn | Deep Learning with TensorFlow | Data Analysis & Visualization | Generative AI & LLM Fundamentals
